Dear Colleague, Dear Friend,

We are delighted to invite you to the 9th Milano Masterclass (MiMa), March 24-28, 2017 for a stellar educational program.

Over the past 8 biennial editions, almost 4000 participants from 87 countries have witnessed the rise of MiMa into a meeting of truly global significance. We are proud to see that MiMa formula for quality education has been copied as a model for meetings worldwide.

The 2017 edition promises to push the boundaries of our knowledge to new frontiers. Ten hottest controversies will be discussed and debated by world leaders from a multi-specialty Faculty. From Friday the 24th until Tuesday the 28th, top-notch experts will present their cutting edge techniques that will supplement your armamentarium of accessible solutions for both common and atypical challenges.

Each days's teaching and interaction will feature video-panels, case-discussion arenas, technically-focused lectures, masters' duels from opposite standpoints, video blast sessions, selected oral and video abstract presentations, and spirited discussion on controversies.

The programme has been specifically designed for both newcomers and experienced surgeons. While younger surgeons will be taught the fundamentals of safe and reproducible surgery, senior colleagues will have the opportunity to refresh their ideas in critically important matters.

Each segment can be registered for separately or taken together for a reduced fee.

Milan leads the world in its wealth of cultural heritage, such as the Duomo and Da Vinci's Last Supper, challenges the fashion industry to keep up with its constant sense of innovation, produces cutting edge technology for the car industry, and delights the senses due to its superlative cuisine.

We look forward to seeing you again, and welcoming our new friends.

Arrivederci,

Paolo Castelnovo & Pietro Palma
